

NEW Magnetic PDR Roller Tip

- makes PDR work everyone's work
- new essential training tool

Magnetic PDR Roller Tip tool is a significant improvement especially in training purposes for the non-experienced PDR technician.

Part no. 13999 Magnetic PDR Tool

The training of eye-hand coordination is one of the most difficult exercises during the training Paintless Dent Repair (PDR). Trainees often spend several hours or days before they can find the exact location of the tip of the tool.

HBC system has managed to find a solution for this issue by producing a PDR training tool with a magnetic tip. A steel ball on top of the panel follows the tip wherever it goes which makes it much easier to find the exact location of the tip of the tool.
